Auxis IT Services

Technical Capabilities Aligned with Your Business Objectives

Today's IT executives are the front line for driving business growth. They are required to not only effectively maintain and manage the basic technology needs of the organization, but bring innovation through new technologies and capabilities, maximize limited resources, and strategically align with the business needs. The forward thinking IT organization must be more agile, flexible and equipped to keep up with the ever-changing demands of the business.

For more than 15 years, our clients have valued our ability to make sense of a complex global market place, help them gain a competitive advantage, and enable them with the strategy, tools and capabilities designed for success.

What Our Clients Say

"Since originally partnering with Auxis to manage our IT function, our IT capital expenditures have dropped approximately 25%, while the process discipline, and customer service and support has increased substantially."

— Andre Teixeira
EVP & CFO, The Graham Companies

"Auxis' commitment, accountability and personal hands-on approach was refreshing. It was very clear that their team was concerned about OUR success. Auxis completely earned our trust and respect."

— Barbara Gomez,
CFO, Latin America Beverages
North and Mexico at Pepsico

"They immediately helped reduce management overhead...we started to be able to sleep at night."

— Michael D. Stebel
COO of QQ Solutions

"The culture of Auxis has always been do what they say they will do and deliver the solution."

— Joe Harber
VP of Strategy Applica Consumer Products

THE AUXIS DIFFERENCE

A passion for proven results. Seasoned, high performance team. Creative, strategic thinking. These attributes are at the heart of the Auxis organization. For over 15 years, Auxis has helped our clients develop the IT strategies and business infrastructure needed to drive long term, profitable growth.

CLIENT SPOTLIGHT

Overview: Designed and built complex back-end procedures to perform business-rules driven pricing, fee, tax and sourcing engines
Performed re-implementation of Oracle E-Business Suite 11.5.10 with custom Java Workbenches interfacing with Oracle

Result: New Systems platform supported doubling of company operations to \$19B in annual revenues, supporting 8,500 customers and 8,000 suppliers across 200+ countries

Overview: Designed and implemented best practices for IT Management and Operations for the enterprise
Outsourced IT Operations Management (24x7) and end-user support
Implemented several infrastructure technology projects resulting in scalable, efficient and cost effective solutions to the business

Result: Significantly improved server, storage and network operations by using IT Service Management best practices and proven process methodologies
Adopted a scalable pricing model, leveraging nearshore and local resources, that was fully aligned to the dynamic agency needs and practices
Implemented management and operational disciplines to enable increased **visibility and justification** over IT expenditures and investments

Overview: Led multi-year project to update outdated operating model which impeded its ability to serve its customers in an environment of increased competition and decreasing margins
Outsourced IT Operations Management (24x7) and end-user support

Result: New operating platform supported a **doubling of the companies revenue and 500% + improvement in EBITDA**
Achieved 40% reduction in IT infrastructure related operating costs, with dramatically improved service levels, over a four year timeframe, even as company doubled in size

Overview: Led design and build of a custom POS and Business Intelligence solution to enable the capture and analysis of key sales, inventory and operational data

Result: Project delivered **on-time and within budget**
New operating platform **supported a tripling of both annual revenues to \$620MM and income from operations to over \$50MM**
